

Be Ready "Before The Moment"™

Pixel Sunscreen™ V2.0 Instructions

Instructions for proper folding and accessory use.

Proper Folding Technique

WARNING! Be sure to fold Pixel Sunscreen properly. Failure to do so may cause irreparable damage and will void warranty.

Remove any equipment from internal pockets and attachments. Hold Pixel Sunscreen, as shown, placing thumbs on outlines.

Slowly twist sides inward, beginning with right-hand side.

Fold left side over right. Other sides will fold inward naturally, with same action.

Bring sides together to form a flat, disc-like shape.

Stretch mesh around the edges to keep closed.

Pixel Sunscreen V2.0, shown fully closed. To open, carefully spread mesh apart and Pixel Sunscreen will spring open.

Non-Slip Coated Platform

The lower panel is coated with a non-slip pattern to prevent the laptop from sliding while inside the Pixel Sunscreen.

Connecting Cables and Devices to Laptop

Use opening at the bottom rear of Pixel Sunscreen to attach power cords and other laptop accessories/peripherals.

Similar openings on the left and right sides allow access to ports on either side of the laptop.

Document Clip

Attach reference documents to removable clip.

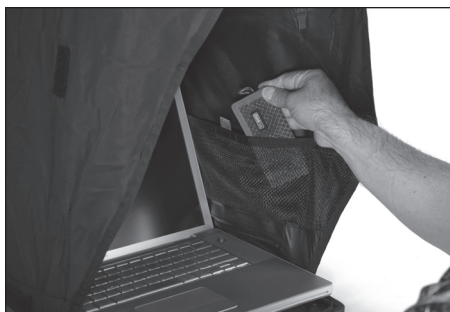

The webbing on the clip allows placement on various points inside Pixel Sunscreen.

The document clip can also be reattached to the exterior left or right sides.

Interior Mesh Pockets

Use the inner mesh pockets to carry small items needed while working on the laptop. Empty pockets of contents prior to folding Pixel Sunscreen to avoid loss or damage.

Integrated Dark Cloth

A built-in dark cloth is stored in the top pocket. Use this to further block bright sunlight from affecting the laptop screen.

Drape dark cloth over your head and shoulders for easier editing in bright sunlight.

Hold Down Tab

Pull the hook-and-loop strap at the top edge down and attach it to the corresponding patch underneath the Pixel Sunscreen. This allows the Pixel Sunscreen to be temporarily lowered, without folding, as needed.
